FURTHER EDUCATION CFO PROGRAMME

The Further Education CFO programme is a subsidised leadership development programme for high-performing senior finance professionals and CFOs in the Further Education sector. As the role of today’s CFO continues to evolve, current and hopeful CFOs must be able to lead change, inspire teams and sell complex commercial strategies to stakeholders to drive organisation performance. That’s where the Further Education CFO programme excels.

I really enjoyed the interactivity of the sessions. The programme struck an excellent balance between structured input and collaborative discussion. The networking and peer learning were particularly valuable, as many of us are facing similar challenges across the sector. I also found the facilitation to be of a very high standard. The session on managing difficult conversations and giving constructive feedback was especially impactful. It has increased my confidence in approaching those discussions.
